

CROP THAT! SEMINAR SERIES

Free educational program on common crops that have commercial viability.

Jump into Spring with UF/IFAS Extension Sumter and Volusia Counties by attending the ‘Crop That!’ Lunch and Learn seminar series!

‘Crop That!’ is a webinar series in which each program is 45 minutes long. While this series is meant for the beginner farmers looking for ideas and who still work full time off farm, anyone interested in learning about crops that are commercial grown in Florida are welcomed to attend. Each webinar will cover production methods, pros, cons and economic considerations.

Join Cami Esmel McAvoy and Karen Stauderman for this free webinar on the second Friday of each month (February to June).

NOTE: Participants will receive a link for the webinar 24 to 48 hours before it is scheduled to start.
